

WIPES AND RAGS CLOGGING SEWAGE PUMPS?

Fix Your Problem PERMANENTLY With A JWC Environmental Grinder

- Protect your pumps!
- Avoid costly repairs!
- Prevent dirty clean ups!
- Resolve notices of violation!
- Minimize maintenance costs!

Managing facilities can present daily challenges. The last thing a facility manager wants to deal with is a problem with the on-site sewage systems. Protect your facility from toilet backups, expensive ejector pump repairs and even worse raw sewage spills by installing a JWC grinder. The JWC dual shafted low speed high torque grinder can shred adult diapers, rags, wipes and anything else into small particles ensuring they flow harmlessly through pumps!

Stop Emergency Plumbing Repairs

The HYDRO Inline Sewage Grinder fits 4" (100mm) or 6" (150mm) sewer lines inside any facility. Its compact size and ability to install sideways or even upside down makes it easy to fit the grinder almost anywhere in the building.

The HYDRO Channel Sewage Grinder installs inside an underground sewer vault or pump station on the owner's property ensuring that the discharge does not clog local municipal pump stations downstream. JWC grinders are a perfect way to resolve an existing municipality violation or ensure no more violations are received.

The Muffin Monster Manhole with HYDRO Sewage Grinders makes installing a new grinder simple. Perfect for prisons, hospitals, nursing homes or any other facilities that need to grind-up rags and trash in the sewage before it enters a municipal wastewater system.

JWC Environmental's HYDRO sewage grinders are the industry leading solution for putting an end to a facility's pump clogging and ragging issues. JWC's grinders have been used in municipal sewage systems worldwide for over 40 years to shred up tough solids.

Features

- Powerful dual shafted, high torque grinder to tear through the toughest debris
- Compact design - fits almost anywhere
- Provides complete sewer pump protection
- Integrated solution to ease installation

Benefits

- Stop emergency plumbing repairs by protecting pumps 24/7 from wipes and trash
- Eliminate costly clean-up of sewer spills
- Resolve Notices of Violation (NOV) from municipal wastewater authority
- Minimize maintenance costs by reducing need for pump clean outs
- Expedited delivery options available direct from the factory
